WINSTON WIGGINS - DIRECTOR

BOARD OF LAND COMMISSIONERS

DIRK KEMPTHORNE Governor

PETET, CENARRUSA Secretary of State

ALAN G. LANCE Attorney General

Sup't of Public

Instruction

Members of Forest Products Industry Prospective Purchasers Other Interested Parties

It is our pleasure to provide you with a listing of timber sales in your area that the State of Idaho State Controller may offer at public auction during the period July 1, 2002, to June 30, 2003.

MARILYN HOWARD

The TIMBER SUPPLY STABILIZATION ACT, Idaho Code, Title 58, Chapter 10, requires that each bidder be a "Qualified Bidder" on all sales offered except the North Potato Hill sale on the Ponderosa Supervisory Area. On March 12, 2002, the State Board of Land Commissioners passed a policy suspending the "qualified bidder" requirement on all endowment land timber sales (except cedar pole sales) south of the Salmon River and north of the St. Joe River.

The indicated volumes for the following supervisory areas are approximations and may change upon more detailed examination and sale preparation.

Area	Sawlogs (MBF)	Cedar Poles (Pcs)	Pulp (MBF)	Cedar Products (MBF)
Priest Lake	15,600	2,000	1,200	
Kootenai Valley	7,000			
Pend Oreille Lake	8,930	2,000		
Mica	3,670			
Cataldo	3,200			
St. Joe	42,220	7,900		3,745
Ponderosa	19,120	4,400		7.83.237
Clearwater	26,255	3,725		70
Maggie Creek	14,000	574-11710	1,000	200
Craig Mountain	4,000		800	
Payette Lakes	21,000			
Southwest	10,000			
Eastern Idaho	3,000			
Totals	177,995	20,025	3,000	4,015

Should you need additional copies of these plans or wish more detailed information on any particular sale, please feel free to contact your nearest Idaho Department of Lands office.

Sincerely,

WINSTON A. WIGGINS

Director

TYPES OF SALES

Timber Sales

Volumes exceeding 1,000 MBF with an appraised value of more than \$150,000. These sales are advertised for four weeks in a newspaper in the county where the sale is located, and are sold at public auction.

Salvage Sales

Volumes not exceeding 1,000 MBF with an appraised value of \$150,000 or less. These sales are advertised for one week in a newspaper in the county where the sale is located, and are sold at public auction.

Direct Sales

Volumes not exceeding 100 MBF with a value of \$15,000 or less. Generally used to harvest isolated parcels of timber of insufficient value to justify advertisement. These sales require no advertisement and are not used if more than one party is interested in the timber involved.

TIMBER AND SALVAGE SALE FINANCING

Initial Purchaser Deposits and Charges

a. Advertisement: Purchaser payment of actual cost of advertisement within 10 days of sale

date.

b. Initial Deposit: 10% of net sale value. This money is held as a noninterest-bearing

reserve account and applied toward the last billing period and/or refunded.

2. Bonding Acceptable forms include Surety, Cash, Certificate of Deposit, and

Irrevocable Letter of Credit.

a. Performance Bond: 15% of net sale value within 30 days of sale date.

b. Payment Guarantee. An acceptable bond to guarantee payment based on the value of 90 days

of production, or a cash deposit (bond) to guarantee the full value of a

cutting unit.

3. Contractual Payments

a. Stumpage: Billed monthly or prepaid by cutting unit on lump sum sales.

b. Interest: Billed monthly - interest at the rate of 6% per annum charged from the

date of sale to the date of billing or date of payment on lump sum sales.

c. Scaling: Billed monthly.

d. Slash: Billed monthly.

Electronic Fund Transfer

The State encourages payments over \$100,000 to be paid using Electronic Funds Transfer (EFT) in accordance with instructions outlined in the Idaho State Treasurer's Office Electronic Remittance Guide. A payee may elect to make payments under \$100,000 using EFT. Purchasers must be signed up with the Idaho State Treasurer's Office before they can make EFT payments. This process takes approximately 30 days. Purchasers are required to provide written notification to the Coeur d'Alene Staff Office at least five business days prior to making any EFT payment. EFT payments for monthly billings must be made on or before the due date or late penalties will be assessed.

5. Cutting Permits

Prior to obtaining a cutting permit, the purchaser must furnish a logging plan and an acceptable payment bond at least equal to the estimated value of the amount of forest products to be harvested during the next 90-day period, or a cash deposit (bond) equal to the value of timber to be harvested from a cutting unit.

6. <u>Development Credits</u>

Allowed at the rate of 75% of each load value until the total credit has been recovered by purchaser.

7. Contract Extension

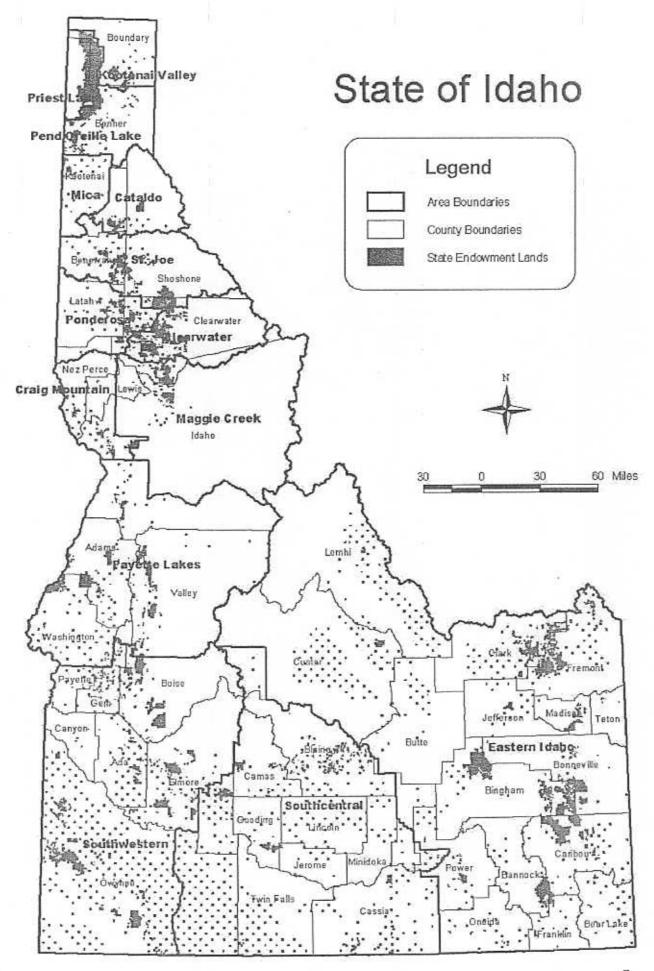

Sale extensions will be considered on a year-to-year basis if requested by the purchaser as provided for by Idaho Code Section 58-413. The purchaser must pay additional interest and/or extension fees as determined by the State Board of Land Commissioners. This additional interest will be computed from the date of sale to the date of billing.

For timber sale information, contact the respective Area office as shown in the list below. See following page for map of Supervisory Areas.

ADMINISTRATIVE RULES OF THE DEPARTMENT OF LANDS

METHOD OF SELLING POLE-QUALITY WESTERN RED CEDAR

IDAPA 20 TITLE 02 Chapter 09

These rules were printed from the Idaho Department of Lands home web page at internet address <www2.state.id.us/adm/adminrules/rules/idapa20/20index.htm>. For an official or certified copy of these rules, contact the Office of Administrative Rules Coordinator, 700 West State Street (4th Floor), P. O. Box 83720, Boise, ID 83720-0011.

IDAPA 20 TITLE 02 Chapter 09

20.02.09 - METHOD OF SELLING POLE-QUALITY WESTERN RED CEDAR

000. LEGAL AUTHORITY.

These rules set forth the policy and procedures for selling pole-quality cedar. These rules are adopted pursuant to and shall be construed in a manner consistent with the duties and responsibilities of the Idaho Board of Land Commissioners as set forth in Idaho Code Title 58, Chapters 1 and 4, and Article IX, Sections 7 and 8 of the Idaho Constitution.

(9-3-90)

001. -- 009. (RESERVED).

010. **DEFINITIONS.**

- 01. Cedar. Western Red Cedar (Thuja plicata) which is a forest species that is plentiful on state-owned lands in northern Idaho. (9-3-90)
- **02.** Cedar Pole. A segment or portion of a cedar tree that can be manufactured into a pole meeting the specifications set out in Appendix A. (9-3-90)
 - 03. Department. The Idaho Department of Lands.
- **04. Development Sites.** Skid trails and landings used for the transportation and concentration of forest product logs on endowment lands. (9-3-90)

(9-3-90)

- 05. Jammer. A two (2) drum winch with a spar, generally mounted on a truck, which is capable of skidding logs. (9-3-90)
 - 06. Length Class. The length of a pole in five (5) foot increments. (9-3-90)
- 07. Pole-Quality Cedar. Means cedar trees in sufficient numbers, density, and quality to be suitable for making cedar poles. (9-3-90)
 - **08.** Roads. Forest access roads used for the transportation of forest products. (9-3-90)
- 09. Scribner Decimal C Board Foot Measure. The measurement of forest products in accordance with the log rule described in Idaho Code, Title 38, Chapter 12, Idaho Code, and the rules promulgated thereunder.

 (9-3-90)
- 10. Skyline Cable Logging. Methods of powered cable logging which provides full or partial suspension of logs during the skidding operation and is capable of skidding logs long distances. (9-3-90)

011. -- 014. (RESERVED).

015. GUIDELINES FOR SALE SELECTION.

- 01. Size. Pole-quality cedar sales shall primarily consist of pole-quality cedar trees containing twenty (20) foot and larger cedar poles. Pole-quality cedar trees containing twenty/twenty-five/thirty (20-25-30) foot length class cedar poles may be harvested as poles or sawlogs at the purchaser's discretion unless such trees are reserved.

 (9-3-90)
- **Number Of Trees**. Each pole-quality cedar sale shall contain at least one hundred fifty (150) pole-quality cedar trees. (9-3-90)
- 03. Density, Tire Skidding. The number of pole-quality cedar trees on terrain suitable for tractor and rubber-tired skidding operations shall be five (5) or more per acre. (9-3-90)

- 04. Density; Jammer Or Skyline Cable. The number of pole-quality cedar trees on terrain suitable for jammer or skyline cable logging shall be ten (10) or more per acre. (9-3-90)
- 05. Maximum Amount Of Sawlogs. Sawlogs and other forest products shall not exceed fifty percent (50%) of the total sale volume, excluding materials generated through the construction of roads and development sites.
- 06. Poles Within Sawlog Sale. If any area within a sawlog sale contains two hundred fifty (250) cedar poles or more in a density of at least ten (10) poles per acre, the area shall be reserved for a pole-quality cedar sale.
- 07. Number Or Density Exceptions. If a sale area does not contain the number or density of poles set out in Subsections 015.02, 015.03, or 015.04, the department may nevertheless offer a pole-quality cedar sale if such sale appears to be economically feasible.

 (9-3-90)

016. -- 019. (RESERVED).

020. SALE PROCEDURES.

- 01. Estimates Of Amount. When preparing a pole-quality cedar sale, the department shall estimate the number of poles by length class and the volume of cedar logs, cedar products, and other species. (9-3-90)
- 02. Scaling Method. Cedar logs, products and other species of sawlog material shall be appraised, bid and sold on the Scribner Decimal C board foot measure. (9-3-90)
- 03. Length Class Appraisal. Cedar poles shall be appraised and bid by length class (lineal foot basis). The conversion table set out below shall be used to establish the corresponding board foot volume. (9-3-90)

04. Length To Volume Conversion Table For Western Red Cedar Poles:

Pole Length	Board Feet Each	Poles Per MBF#
20'	22	45.45
25'	36	27.78
30'	50	20.00
35'	70	14.28
40'	101	9.90
45'	161	6.21
50'	239	4.18
55'	261	3.83
60'	304	3.29
65'	418	2.39
70'	462	2.16
75'	512	1.95
80'	595	1.68
85'	736	1.36
90'	792	1.26

Po	ole Length	Board Feet E	ach Poles Per MBF#
	95'	892	1.12
	100'	929	1.08
	105'	1113	0.90
44 A	110'	1132	0.88
	115'	1420	0.70
	120'	1475	0.68

(7-1-93)

- * Based on Scribner Decimal C board foot measure
- 95. Bidding Limited To Cedar. When cedar represents eighty percent (80%) or more of the total appraised value, bidding shall be limited to cedar poles and cedar sawlogs only. (9-3-90)
- 06. Election Of Bidder. The successful bidder may elect to remove cedar as cedar poles, sawlogs, and products or sawlogs and products. Such election shall be made prior to completion of the sale agreement. (9-3-90)
- o7. Election To Manufacture. If the successful bidder elects to manufacture cedar poles, poles and sawlog material shall be removed at bid prices (lineal foot basis for poles and MBF basis for sawlogs). Pole-quality cedar trees containing twenty/twenty five/thirty (20-25-30) foot length class cedar poles may be harvested as poles or sawlogs at the purchasers discretion unless such trees are reserved.

 (9-3-90)
- 08. Election Not To Manufacture. If the successful bidder elects not to manufacture cedar poles, the bid values of cedar poles and cedar sawlog material shall be weighted by volume to determine the selling value for all cedar sawlogs as shown in the following example.

 (9-3-90)

09. Typical Bidding Pole-Quality Cedar Sale:

(Gedar Poles)								
Length Class	Number Poles	Volume (MBF)	Lineal Feet	Final (\$/in ft)	Bid Val (Cedar)			
35'	400	28.00	14,000	\$0.90	\$12,600			
40'	350	35.35	14,000	1.10	15,400			
45'	300	48.30	13,500	1.10	14,850			
50'	250	59.75	12,500	1.23	15,375			
55'	200	52.20	11,000	1.32	14,520			
60'	100	30.40	6,000	1.50	9,000			
65'	25	10.45	1,625	1.85	3,006.25			
70'	10	4.62	700	2.50	1,750			
		269.07M	÷ (200)		\$86501.25			

(Cedar Sawlogs)						
Species	Volume (MBF)	Final Bid (\$/MBF)	Bid Value (sawlogs)			
Cedar	250 M	\$110.00	\$27,500			

Pole Removal Option:

- Remove poles at bid prices (\$/lineal foot).
- 2. Remove cedar sawlogs at \$110.00/MBF.

Sawlog Removal Option:

Total Sale Value \$114,001.25

Sawlog price = _____ = \$219.63/MBF

(\$/MBF) Cedar Volume (MBF) 519.07 (MBF) (7-1-93)

021. -- 024. (RESERVED).

025. POLE SPECIFICATIONS.

The following manufacturing and grading specifications and dimensions for cedar poles are primarily in accordance with or adopted from standards established by the American National Standards Institute, Inc. The table containing over-bark measurements for western red cedar poles was compiled and adopted as a guideline from a study by the Idaho State Board of Scaling Practices.

(9-3-90)

Classification. The true circumference class shall be determined as follows: measure the circumference at six feet from the butt end. This dimension will determine the true class of the pole provided its top (measured at the minimum length point) is large enough. Otherwise the circumference at the top will determine the true class, provided that the circumference at six (6) feet from the butt does not exceed the specified minimum by more than seven (7) inches or twenty percent (20%), whichever is greater.

(9-3-90)

02. Permitted Defects. (7-1-93)

- a. Firm Red Heart. Firm red heart not accompanied by softening or other disintegration (decay) of the wood is permitted. (9-3-90)
- b. Defective Butts and Tops. Hollowing in the butt caused by "splinter pulling" in felling the tree is permitted, provided that the area of such a hollow is less than ten percent (10%) of the butt area. Hollow heart is permitted in cedar poles provided that the area of the hollow does not exceed ten percent (10%) of the butt area, and that the depth of the hollow does not exceed two (2) feet, measured from the butt surface. Decay is also permitted in the butt of cedar poles provided that the aggregate area of decay and hollow heart does not exceed ten percent (10%) of the entire butt surface and does not occur closer than two inches to the side surface. No decay is permitted in the top of western red cedar poles.
- c. Insect Damage. Insect damage, consisting of holes one-sixteenth (1/16) inch or less in diameter or surface scoring or channeling is permitted. All other forms of insect damage are prohibited, except those associated with hollow heart in cedar poles.

 (9-3-90)
- d. Knot. The diameter of any single knot and the sum of knot diameters in any one (1) foot section shall not exceed the limits of Table 1. Knots containing soft or loose fibers (decay) which are not associated with heart rot are accepted. Knots shall be trimmed smooth.

TABLE 1 - LIMITS OF KNOT SIZES

		Maximum Sizes Per	mitted
	Diameter of ar (Inc.	ny Single Knot hes)	Sum of Diameters of All Knots Greater Than 0.5 Inch in Any 1-foot Section (Inches)
Length of Pole	Classes - H6 to 3	Classes - 4 to 10	Classes - H6 to 10
45 feet and shorter			
Lower half of length	3	2	8#
Upper half of length	5	4	Part No. of the Land of the La
50 feet and longer			
Lower half of length	4	4	10#
Upper half of length	6	6	

#Both upper and lower halves

- e. Dead Streaks. A single, sound dead streak is permitted in western red cedar, provided the greatest width of the streak is less than one fourth (1/4) of the circumference of the pole at the point of measurement. A sound cat face is accepted if not over two (2") deep, if the diameter is ten (10) inches or less, or one fifth (1/5) the pole diameter at the location of the scar, if the diameter is more than ten (10) inches, and not located within two feet of the groundline.

 (9-3-90)
- f. Shape. Poles shall be free from short crooks. A pole may have sweep subject to the following (9-3-90)
 - i. Where sweep is in one (1) plane and one (1) direction only. (7-1-93)
- (1) For poles fifty (50) feet and shorter, a straight line joining the surface of the pole at the groundline and the edge of the pole at the top, in ninety percent (90%) or more of an inspection lot, shall not be distant from the surface of the pole at any point by more than one inch for each ten (10) feet of length between these points. In the remainder of the inspection lot ten percent (10%), the poles may have a deviation of one inch for each six (6) feet of length when measured as above.

 (7-1-93)
- (2) Poles fifty-five (55) feet and longer shall meet the one (1) inch in ten (10) feet requirement in seventy-five percent (75%) or more of an inspection lot. In the remainder of the lot (twenty-five percent (25%)), the poles may have a deviation of one (1) inch for each six (6) feet of length when measured as below. (See Fig. 1, Diagram 1.)
- ii. Where sweep is in two (2) planes (double sweep) or in two (2) direction in one (1) plane (reverse sweep), a straight line connecting the midpoint at the groundline with the midpoint at the top shall not at any intermediate point pass through the surface of the pole. (See Fig. 1, Diagram 2.)

 (9-3-90)

03. General. (7-1-93)

- a. Poles shall be produced from live green trees and manufactured to the longest possible length according to the over-bark measurement, unless agreed otherwise by contract (refer to Table 2). These are minimum measurements taken at six (6) feet from the butt end and may be exceeded by seven (7) inches in circumference or twenty percent (20%) whichever is greater.

 (9-3-90)
 - b. Excessive swell, flare, or churned butts shall be cut back. (9-3-90)

c. Barkie poles should be cut twelve (12) to twenty-four (24) inches over-length to allow for end damage from hooks, tongs, fork lift, or dozer blades or tracks, etc. Mechanical and worm damage is a purchaser/producer problem and is not subject to an adjustment for defect. (9-3-90)

026. -- 029. (RESERVED).

030. NINE PERCENT POLE WAIVER.

Notwithstanding any other administrative rules of the Department of Lands to the contrary, for the purposes of the Nine Percent (9%) Pole sale, located in Pts. S1/2SW, Section 16, and Pts. NENE, Section 20, Township 40 North, Range 5 East, compliance with Rule Subsection 015.04 of the Rules for the Method of Selling Pole-Quality Western Red Cedar is waived. Section 030 will expire upon cancellation of the Nine Percent (9%) Pole sale. (9-3-90)

031. -- 999. (RESERVED).

011	014.	(RESERVED).					
015.	FIRE	WOOD PERMITS.					
01. Free Use Permits. Free use firewood areas may be designated by the department to encourage the removal of firewood as a benefit to the management of endowment lands. Examples would be clearcuts and logging							

IDAHO ADMINISTRATIVE CODE Department of Lands

IDAPA 20.02.10 - Rules for Selling Forest Products on State Endowment Lands

debris adjacent to roads. Free use permits for not more than ten (10) cords will be issued and valid only in designated free use firewood areas. (10-26-92)

02. Charge Permits. Permits issued outside of Free Use Firewood areas will be sold on a charge basis at a fee schedule determined by the Board.

016. PERSONAL USE PRODUCT PERMITS.

Dead and down forest products and brush growing on state lands which are not required for water conservation and are not suitable for sawing, manufacturing, or processing may be sold by the department for the personal use of the individual without advertisement. Permits for the sale of dead and down forest products will not exceed five hundred dollars (\$500) in value per permit.

017. -- 019. (RESERVED).

020. DIRECT SALES.

The direct sale of forest products without advertisement may be authorized by the director if the net appraised value does not exceed the maximum value established by the state board of land commissioners and the volume does not exceed one hundred thousand (100,000) board feet in volume. This type of sale is to be used to harvest isolated or bypassed parcels of timber of insufficient value and volume to justify a salvage sale (refer to Rule Section 021). The direct sale shall not be used where two (2) or more potential purchasers may be interested in bidding on the forest products offered for sale. The duration of a direct sale shall not exceed an initial period of six (6) months with a provision for one six (6) month extension. The purchaser shall furnish an acceptable performance bond in the amount of thirty percent (30%) of the sale value with a minimum bond of one hundred dollars (\$100). Advance payment will be required and all sales will be on a lump sum basis.

021. SALVAGE SALES.

Salvage sales shall not exceed the net appraised value established by the state board of land commissioners and one million (1,000,000) board feet in estimated volume and are intended to be used in the harvesting of timber which, in the opinion of the director, is of insufficient quality and/or quantity to support a timber sale (refer to Rule Section 022). Salvage sales shall be advertised one week in a newspaper located in the county in which the sale is located and sold at an oral auction. The contract requirements for salvage sales shall be the same as for timber sales. (7-1-96)

022. TIMBER SALES.

Sales exceeding the net appraised value for salvage sales established by the state board of land commissioners net appraised value and one million (1,000,000) board feet in estimated volume are designed to produce maximum stumpage returns to the endowment funds consistent with prudent long-term management practices. (7-1-96)

023. -- 024. (RESERVED).

025. ANNUAL SALES PLAN.

The department will prepare an annual sales plan which will describe the timber sales to be offered for sale during the forthcoming fiscal year. The annual sales plan will be based on recommended annual harvest volumes utilizing inventory reports, local stand conditions, special management problems, and economic factors. The plan will be presented to the Board for approval annually. Upon approval the plan will be printed and distributed to all interested parties. The annual sales plan may be altered to respond to changing market conditions or to expedite the sale of damaged or insect-infested forest products. Each individual timber sale will be submitted to the Board for approval prior to advertisement.

026. -- 029. (RESERVED).

030. TIMBER SALE ADVERTISING AND PROSPECTUS.

Advertising. All timber sales shall be advertised in one (1) or more newspapers, one (1) of which shall be in the county where the sale is located, once a week for four (4) consecutive weeks. In cases of catastrophic damage caused by insect, weather, or fire, the Board may direct an advertisement of less than four (4) consecutive weeks. If such sale is located in more than one (1) county, it shall be advertised in each of the respective counties. The advertisement shall state the time, place, description of the land by legal subdivision on which sale is located, volume,

IDAHO ADMINISTRATIVE CODE Department of Lands

IDAPA 20.02.10 - Rules for Selling Forest Products on State Endowment Lands

and minimum appraised price below which no bid will be accepted. The cost of advertisement will be paid by the sale purchaser within ten (10) days of the date of sale. (10-26-92)

O2. Prospectus. In order to ensure that prospective bidders have sufficient notice and information on state timber sales, the department will prepare and mail a sale prospectus to any person who requests placement on the timber sale mailing list or who the director believes is interested in such sales. (10-26-92)

031. TIMBER SALE AUCTIONS.

- Qualifications For Bidding. Any person is qualified for bidding upon presentation to the department at the time of sale a bid deposit in a form acceptable to the state in the amount of ten percent (10%) of the net appraised value, provided such person is not delinquent on any payments to the state at the time of sale, that such person is not a minor as defined in Section 32-101, Idaho Code, and that such person meets the bidding qualifications described in IDAPA 20.02.11, the Rules for the Timber Supply Stabilization Act of 1989 on State Forests. Foreign corporations as defined in Section 30-1-106 shall procure a certificate of authority to do business in Idaho to be eligible to bid on and purchase state timber.
- Opening The Sale. The director's representative will open the sale, read the advertisement, and ask for questions. The director's representative will then accept bid deposits as described in Subsection 031.01, which will qualify any person to participate in the auction. Each qualified bidder will select a numbered card to determine who will be allowed the first bid. The person entitled to the first bid may bid the minimum appraised or any higher price. Any other person is then entitled to bid on any or all species of forest products with a bid not less than ten cents (\$.10) per thousand (1000) board feet or one cent (\$.01) per lineal foot for poles. Bidding progresses with each previous bid being accepted by the last bidder. All bidding is done orally and in the form of an auction. (10-26-92)
- 03. Closing The Sale. The director's representative will close the sale and award the sale to the successful bidder. Checks will be returned to the unsuccessful bidders. Sale values and charges will be calculated on the day of sale, and within ten days the successful bidder will be required to pay the cost of advertising plus the difference between the bid deposit value (refer to Rule Subsection 031.01) and ten percent (10%) of the net sale value.

 (10-26-92)

032. TIMBER SALE CONTRACT SIGNATURES.

A contract and supplemental documents including bond forms are prepared by the department and sent to the successful bidder with appropriate instructions following the day of sale. The purchaser then returns the executed signed contract, accompanied by the applicable bonds, for signature by the governor, secretary of state, and director. The sale is considered consummated when all signatures are affixed. The original contract is then returned to the purchaser. The document is a binding contract which cannot be altered except through mutual agreement of the Board and the purchaser.

(10-26-92)

033. INITIAL DEPOSIT AND BONDS.

- 01. Initial Deposit. The initial deposit (ten percent (10%) of net sale value) shall be retained by the state as a cash reserve for the duration of the contract; the purchaser shall not be entitled to any interest earned thereon. The state may at its discretion apply all or a portion of the initial deposit as final payment for forest products removed and/or to satisfy other contractual obligations. (10-26-92)
- **Performance Bond.** A bond in the amount of fifteen percent (15%) of the net sale value of the forest products shall be executed within thirty (30) days from the date of sale but prior to execution of the contract. The bond shall be in a form acceptable to the department, conditioned upon the purchaser's compliance with all laws and rules of the state of Idaho applicable to the purchase, all provisions of the contract, and all other terms and conditions imposed by the state. The state shall have the right to cancel the contract if the purchaser allows the bond to lapse at any time during the term of the contract.
- 03. Guarantee Of Payment. Prior to cutting of any forest products, the purchaser shall guarantee the payment of the products to be cut and/or removed by providing a noninterest-earning cash bond or filing a payment bond in a form acceptable to the department. The amount of the cash bond or payment bond, exclusive of the initial deposit, shall be determined by the department and shall be at least equal to the estimated net value of the amount of

forest products to be harvested during the next ninety (90) day period based on the purchaser's written estimate, except a cash bond may be made in an amount equal to the entire net value of the timber to be harvested from a cutting unit as described and included in a cutting permit issued by the department. The director reserves the right to call for additional cash bonds or increase of the payment bond if the department's estimate of the forest products to be cut and/or removed exceeds the purchaser's written estimate. Should the purchaser elect not to log in the subsequent ninety (90) day period, the State shall refund or release the purchaser's guarantee of payment upon request of the purchaser, excluding the value of felled or decked forest products remaining on the sale area. (10-26-92)

04. Letters Of Credit. Letters of credit are an acceptable form of performance and/or guarantee of payment bond. A letter of credit shall be irrevocable, prepared in a format prescribed by the director, issued by institutions or through a correspondent bank authorized to do business in Idaho, and the account party on the letter of credit must be identical to the purchaser. (10-26-92)

034. -- 039. (RESERVED).

040. OPERATING PROCEDURES.

- Logging And Operation Plan. Prior to the commencement of any logging or road construction activities, the purchaser shall submit to the department an acceptable written logging and operation plan for that season of operations. This plan shall include the following: description of the area by legal subdivision(s) or cutting unit(s) upon which the purchaser plans to operate; an estimate of the ninety (90) day production schedule; size and type of equipment; name(s) of purchaser representative(s) and of logging or company contractor(s); and road construction schedule (if applicable). Any change or deviation from this plan which increases production in the ninety (90) day production schedule shall be submitted in writing to the department prior to such increase. (10-26-92)
- O2. Cutting Permits. No forest products shall be cut until a cutting permit has been issued by the department. Written notice shall be given to the state describing by legal subdivision(s) or cutting unit(s) the area which the purchaser desires to harvest. The logging and operation plan must be approved by the department and a guarantee of payment provided before a cutting permit will be issued by the state. The department may require all forest products to be harvested and scaled before a subsequent cutting permit is issued. In the event the purchaser violates or breaches any term of the contract, the department may deny issuance of additional cutting permits until corrective action is completed. The purchaser shall give the department two (2) weeks notice before cutting commences on any permitted area. (10-26-92)

041. CHARGES AND BILLING.

- 01. Stumpage And Interest Payments. A stumpage summary of volumes scaled during the prior month and a statement of account will be prepared by the department and forwarded to the purchaser monthly. The statement shall include interest computed from the date of sale to the date of the billing at the rate of six percent (6%) per annum. The purchaser shall make payments within thirty (30) days of the end of the billing period or the payment shall be considered delinquent. (10-26-92)
- **O2. Development Credits.** The recovery of development credits where applicable shall be allowed on all forest products that are billed at the rate of seventy-five percent (75%) of each load value until the entire development credit has been recovered by the purchaser. (10-26-92)
- 63. Fire Protection And Slash Disposal. The purchaser shall be billed annually for the annual cost of fire protection based on a per-acre rate calculated as the most recent average cost for the forest protective district for the lands described in the contract. Additionally, the purchaser shall enter into a separate contract with the department providing for the management of the slash hazard at a rate specified for each sale. The purchaser shall be billed monthly at the specified slash rate for all forest products removed. (10-26-92)
- O4. Scaling Charges. The purchaser shall be billed monthly at the rate in dollars per thousand (1000) board feet or equivalent measure determined by the Board for the cost of scaling or measuring forest products harvested. Should the contract be extended, the purchaser shall pay the prevailing rate for scaling in force at the time of extension, which may not be the amount specified in the contract. Scaling charges will not be collected for forest products which are paid for in advance on a lump-sum basis. (10-26-92)

05. Delinquent Payments. For each delinquent payment, the purchaser shall pay the department a ten dollars (\$10) late charge plus interest at a rate per annum as specified in the contract commencing from the end of the previous billing period. If the delinquent payment, late charge, and interest are not paid, the department may recover the monies due by claim against the payment and/or performance bond. (10-26-92)

042. GENERAL CONTRACT PROVISIONS.

- the terms of the contract shall be presented at a location and in a manner as designated by the department for measurement or scaling. All forest products shall be scaled under the terms of the contract using the Scribner Decimal C Rule in accordance with rules of the State Board of Scaling Practices or specified in the contract by a qualified licensed scaler or scalers selected by the department. Load tickets will be furnished by the state for each sale. All loads of forest products shall have a load ticket attached to the load from the time it leaves the sale area until it is delivered to a location for scaling. Noncompliance will result in penalties specified in the contract. (10-26-92)
- O2. Cutting Limitations. The advertised volume of forest products to be removed from the sale area is an approximation of the sale volume determined using accepted timber cruising procedures. Prospective purchasers are responsible for establishing their own estimate of volume and bidding appropriately. The director shall not provide additional volume of forest products to the purchaser if harvested volumes are less than estimated volumes. The department retains the right to adjust the harvest prescription to provide adequate seed trees and/or tree stocking on site after notifying the purchaser, documenting the justification. If such adjustments are minor in nature, and agreed to by the purchaser, the adjustments may occur immediately upon documentation in the logging report. If such adjustments are major in scope, or if the purchaser does not agree, the purchaser may appeal the adjusted harvest prescription to the director and Board.
- 8. Breach Of Contract. In the event the purchaser breaches any terms of the contract, the department shall have the right to immediately suspend operations by verbal notification to the purchaser to be followed by written notice within five (5) working days. If such breach is not remedied within thirty (30) days after the written notice is mailed, the Board may terminate the contract, and the purchaser shall have no further rights under the contract. Upon such termination, the Board shall enter a forfeiture of the contract, all monies paid by the purchaser under the contract may be forfeited upon order of the Board, and action may be taken to recover damages from the purchaser and/or the surety or sureties.
- 04. Security Agreement. Through the contract, the state shall maintain a security interest in the forest products covered by the contract. The security interest may be claimed upon any breach of the contract by the purchaser. Signature of the parties to the contract shall constitute express approval of the security agreement.

 (10-26-92)
- Contract Period And Extension. All forest products purchased under any contract shall be cut and removed from the described premises during the normal contract period unless an extension is granted from year to year by the director as provided by Section 58-413, Idaho Code, upon payment by purchaser of such additional interest and/or extension fees determined by the director. Additional interest shall be computed from the date of sale to the date of billing at the rate per annum as determined by the Board. At the end of the initial contract period or the last extension, all forest products remaining upon the sale area shall become the property of the state, and the purchaser's right to go upon state lands for the purpose of cutting and/or transporting any forest products shall terminate.
- **06.** Assignments. Sale contracts shall not be assigned without prior written approval of the director and payment by the purchaser of assignment fees determined by the Board. (10-26-92)
- 07. Cancellation. No cancellation, termination, breach, or forfeiture under any provision of the contract shall relieve the purchaser or its surety or sureties from liability to pay all costs and assessments due or payable under the contract at the time of such cancellation, termination, or breach. (10-26-92)
- 08. Responsibility. The purchaser is not an agent of the state. The purchaser shall hold harmless the state of Idaho, its officers, agents, and employees from any and all claims for damages or injuries to persons or

IDAHO ADMINISTRATIVE CODE Department of Lands

IDAPA 20.02.10 - Rules for Selling Forest Products on State Endowment Lands

property that may be sustained by anyone as a result of the performance of the purchaser, agents, or employees in connection with the contract. (10-26-92)

- 09. Compliance With Rules Of The Board And Idaho Code. The purchaser shall comply with all state laws and rules including, without limitation, the following: (10-26-92)
- a. Rules Pertaining to the Idaho Forestry Act and Fire Hazard Reduction Laws, Title 38, Chapters 1 and 4, Idaho Code. (10-26-92)
 - b. The Idaho Forest Practices Act, Title 38, Chapter 13, Idaho Code. (10-26-92)
 - c. The Idaho Stream Channel Alteration Act, Title 42, Chapter 38, Idaho Code. (10-26-92)
 - d. The Standard Log Scaling Law, Title 38, Chapter 12, Idaho Code. (10-26-92)
- e. Transportation of Forest Products, Sections 18-4628, 18-4628A, 18-4629, and 18-4630, Idaho (10-26-92)
 - f. The Environmental Protection and Health Act of 1972, Title 39, Chapter 1, Idaho Code. (10-26-92)
- 10. Catastrophic Damage. Should a catastrophic occurrence materially change the value of forest products removed or significantly increase logging cost for the sale, the purchaser may request the Board to consider a contract modification to make allowances for these conditions. Such requests shall be addressed to the director for review prior to consideration by the Board. (10-26-92)
- 11. Special Terms. Contract terms shall be drafted for each sale based on timber stand conditions, sale objectives, terrain conditions, and development requirements. The contract terms shall include the following:

(10-26-92)

Harvest Specifications, Utilization and Merchantability Standards, Harvest Procedures. (10-26-92)

- b. Hazard Management. (10-26-92)
 - Road Maintenance, Erosion Control Specifications, Right-of-Way Requirements. (10-26-92)
- d. General Sale Administration. (10-26-92)
- e. Development Requirements. (10-26-92)

043. TIMBER SALE ADMINISTRATION.

- Inspections. The purpose of sale area inspections is to ensure compliance with all contract terms and Forest Practices Act requirements. Inspections will be conducted at regular intervals as determined by the state, and the operator/purchaser will be invited to accompany the inspector when possible. (10-26-92)
- **Reports.** A Logging and/or Road Construction Report will be prepared during each sale inspection. The purpose of the report is to document current conditions, progress of the sale, contract compliance and deficiencies, and to inform the purchaser of contract status. (10-26-92)

044. TIMBER SALE CANCELLATION.

- 01. Sale Inspection. The department and purchaser should make a final joint inspection of the sale area to determine that all contractual requirements have been satisfactorily completed. The final inspection shall carefully note the status of the sale area regarding the requirements of the Forest Practices and Hazard Management Acts.

 (10-26-92)
 - 02. Request For Cancellation. When all contractual requirements have been completed, final

IDAHO ADMINISTRATIVE CODE Department of Lands

IDAPA 20.02.10 - Rules for Selling Forest Products on State Endowment Lands

payments have been received, all load tickets have been accounted for, and a written request for cancellation has been received by the department, any credit balances will be returned and/or transferred to other timber sale accounts as requested by the purchaser within forty-five (45) days.

(10-26-92)

- 03. Cancellation Report. A cancellation report will be prepared in a format prescribed by the department. Attachments to the report will include the following: (10-26-92)
 - a. A right-of-way release signed by the grantor, if applicable.

(10-26-92)

- b. A release form signed by the purchaser when the sale is cancelled prior to the original contract period. (10-26-92)
 - c. A certificate of clearance from the appropriate forest protection district.

(10-26-92)

04. Contract Cancellation And Bond Release. The department will audit all sale records to ensure that all payments have been made and all accounts balance. The department will forward a cancellation package and recommendation to the director for consideration. Following approval by the director, the department will notify the purchaser that the sale is cancelled and the bonding agent that the bond may be released. (10-26-92)

045. TIMBER SALE TERMINATION.

01. Request. A timber sale purchaser may, for reasons of hardship, make written request to terminate a timber sale contract before harvesting is completed. In such cases, the Board will determine if a hardship exists and if the contract should be terminated. (10-26-92)

02. Premature Termination Policy.

(7-1-93)

- a. The Board may authorize premature termination of any sale under any terms considered reasonable and appropriate. Generally, the entire ten percent (10%) initial deposit will be retained as a penalty, which amount may not be used as payment for forest products cut and/or removed. Additionally, the Board will seek payment of the value of the overbid for the uncut residual volume. For example, if white pine had been bid up by five dollars (\$5) per thousand board feet over the appraised price and there are one hundred thousand (100,000) board feet of white pine remaining on the sale area, the purchaser will have to pay five hundred dollars (\$500) upon termination. (10-26-92)
- b. If logging has occurred on the sale, the purchaser must complete the units that have been partially logged according to contract standards and complete all development work as specified in the contract to the extent of allowances that have been credited to the purchaser.

 (10-26-92)
- c. The purchaser who has terminated a timber sale contract will not be eligible to rebid that particular sale unless specifically authorized to do so by the Board. (10-26-92)

046. -- 999. (RESERVED).

ADMINISTRATIVE RULES OF THE DEPARTMENT OF LANDS

TIMBER STABILIZATION ACT OF 1989 ON STATE FORESTS

IDAPA 20 TITLE 02 Chapter 11

These rules were printed from the Idaho Department of Lands home web page at internet address <www2.state.id.us/adm/adminrules/rules/idapa20/20index.htm>. For an official or certified copy of these rules, contact the Office of Administrative Rules Coordinator, 700 West State Street (4th Floor), P. O. Box 83720, Boise, ID 83720-0011.

IDAPA 20 TITLE 02 Chapter 11

20.02.11 - TIMBER SUPPLY STABILIZATION ACT OF 1989 ON STATE FORESTS

000. (RESERVED).

001. TITLE AND SCOPE.

These rules set forth the policy and procedures to promote wood processing and manufacturing in Idaho to generate related business and employment opportunities, creating additional corporate and individual income and property taxes for the state and its endowed institutions, and act as a market participant in the forest products market in a way that helps enhance the long-term maximum value of state forests by ensuring that an adequate proportion of the total sales of forest products sold by the state of Idaho is sold to qualified purchasers within Idaho.

(6-3-91)

002. -- 009. (RESERVED).

010. DEFINITIONS.

- 01. Board. The Idaho State Board of Land Commissioners. (6-3-91)
- 02. Director. The director of the Idaho Department of Lands or his authorized representative. (6-3-91)
- 03. Dislocations. An event or combination of events, including but not limited to the closure and/or curtailment of production of wood processing or manufacturing facilities; natural catastrophic events which modify the normal and planned forest products harvest on state forests; or economic conditions which disrupt or modify the ability of qualified bidders to fully utilize the forest products from state forests in a geographic area. (6-3-91)
- **94.** Forest Products. Major forest resources including sawlogs, pulp, cedar poles, and cedar products suitable for split products or other marketable materials. (6-3-91)
 - 05. Person. Any individual, association, partnership, corporation, trust, or other legal entity. (6-3-91)
- 96. Pulp Logs. Any portion of a tree that does not meet the sawlog merchantability specifications of thirty three and one-third percent (33 1/3%) net scale. (6-3-91)
- 07. Qualified Bidder. A person who has neither processed outside of Idaho, nor sold to another person who has processed outside of Idaho, five percent (5%) or more of the cumulative estimated (advertised) total of the forest products from state forests he or she has purchased; provided, however, that the purchase and disposition of pulp logs, as such logs are defined by the Board, shall not be considered in determining whether a purchaser is qualified.

 (6-3-91)
 - 08. State. The state of Idaho. (6-3-91)
- 09. State Forests. All forest lands owned by the state of Idaho, including those lands granted to an institution by the federal government, which are managed or controlled by the Board pursuant to Section 8, Article IX, of the constitution of the state of Idaho.

 (1-26-94)
- 10. Timber Sales. Sales exceeding the net appraised value established for salvage sales by the state board of land commissioners and one million (1,000,000) board feet of forest products in estimated volume designed to produce maximum returns to the endowment funds consistent with prudent long-term management practices.

 (7-1-96)
- 11. Wood Processing Or Manufacturing. The conversion of forest products into finished wood products generally recognized as consumer goods, including, but not limited to: paper, shakes, lumber, shingles, plywood and panel products, utility and other finished poles, and posts and other fence products. Wood processing or manufacturing shall not include removing bark and the intermediate underlying surfaces of logs thereby producing cants for export outside the boundaries of the state.

 (6-3-91)

011. -- 014. (RESERVED).

015. SALE OF STATE TIMBER.

The director shall prepare an annual sales plan which will describe the timber sales to be offered for sale during the forthcoming fiscal year. Ninety-five percent (95%) of the total estimated (advertised) volume of timber sales, exclusive of the estimated pulp log volumes shall be offered for sale to qualified bidders. The remaining five percent (5%) of the total estimated (advertised) volume of the year's timber sales shall be offered to all persons, regardless of whether they are qualified bidders under these rules. The sales to be offered to all persons shall be so indicated on the annual sales plan.

016. -- 019. (RESERVED).

020. BOARD POLICY.

The Board shall, if it finds after consideration of unanticipated dislocations in local forest products supplies that the forest products from state timber sales in certain regions of the state will not be needed by qualified bidders, offer such timber sales for sale to all persons regardless of whether they are qualified bidders under these rules. In addition, if the Board determines that a purchaser who has previously acquired state timber sales is adversely affected by a market dislocation, such purchaser may dispose of his forest products without affecting his qualified bidder status. In the event qualified bidders do not purchase timber sales offered for sale exclusively to them, the Board, if it finds after consideration of the reasons the timber sale was not sold, that it is in the best interests of the state and the endowed institutions, may offer the timber sale to all bidders, without regard to whether they are qualified bidders. The purchase and disposition of such timber sales shall not be considered in determining whether a person is a qualified bidder for subsequent timber sales.

(6-3-91)

021. -- 024. (RESERVED).

025. CERTIFICATION AND APPROVAL OF BIDDERS.

- Purchaser List. The director shall prepare a list of timber sale purchasers for fiscal years 1980-1989. The list will be submitted to the Board to certify qualified bidders. All purchasers on this list will be considered qualified bidders as of July 1, 1989. The list of qualified bidders shall be maintained and updated by the department and approved by the Board. At the request of the Board each bidder shall present forest products purchase and disposition records to show the cumulative annual purchases and disposition of forest products from state forests for the years preceding the date of timber sale in support of certification. However, in no event shall the disposition of forest products from timber sales sold prior to July 1, 1989, be considered.

 (6-3-91)
- timber sales shall provide the Board with names and addresses of all persons who have any financial interest in the purchase or disposition of forest products, whether such interest results from open loans, mortgages, conditional sales, contracts, silent partnerships, trusts, or any other basis other than trade accounts incurred in the ordinary course of business, and the amounts of such interest. Persons seeking certification shall further provide any other information the Board reasonably requires to determine whether such person is a qualified bidder. In determining the status of a person, the Board may take into consideration other evidence, such as scaling records, load tickets for vehicles transporting forest products, and other written and oral testimony. The information received shall be subject to disclosure according to Chapter 3, Title 9, Idaho Code, and shall not be available to the general public unless the person seeking to become a qualified bidder authorizes a release of such information.

 (1-26-94)

026. - 029. (RESERVED).

030. REMOVAL FROM LIST OF CERTIFIED BIDDERS.

The Board shall maintain a list of all certified bidders. The Board shall immediately remove from its list of certified bidders any person who ceases to meet the definition of a qualified bidder. Any person removed from the list of qualified bidders shall be ineligible to participate in any bidding on timber sales reserved for qualified bidders for a period of five (5) years. The Board shall retain the power to make the final determination upon a bidder's status.

(6-3-91)

031. -- 034. (RESERVED).

035. BRANDING OF FOREST PRODUCTS.

The Board or the director may require that the forest products harvested from state timber sales be branded for identification as forest products derived from state timber sales.

(6-3-91)

036. EXPORT OF UNPROCESSED TIMBER BEYOND THE BOUNDARIES OF THE UNITED STATES.

- of the Forest Resources Conservation and Shortage Relief Act of 1990, Publ. L. No. 101-382, section 487, 104 Stat. 714, (1990) (to be codified at 16 U.S.C. 620), originating from lands owned by the state shall not be exported from the United States or be sold, traded, exchanged, or otherwise given to any person unless that person agrees not to export such timber products from the United States.
- **O2.** Export Defined. The term "export" shall mean either direct or indirect export to a foreign country and occurs on the date that a person enters into a contract or other binding transaction for the export of unprocessed timber or, if that date cannot be established, when unprocessed timber is found in an export yard or pond, bundled or otherwise prepared for shipment, or aboard an ocean-going vessel. An export yard or pond is an area where sorting and/or bundling of logs for shipment outside the United States is accomplished.

 (6-3-91)
- 03. Indirect Export. Unprocessed timber is exported indirectly when export occurs as a result of a sale to another person, as a result of any subsequent transaction, or as a result of direct or indirect substitution as defined by the Act, 16 U.S.C. Section 620(a)(1) and 16 U.S.C. Section 620(b)(1), except that for the purposes of this regulation, the term "private lands" shall mean "private lands within the state of Idaho," the term "federal lands" shall mean "lands owned by the state of Idaho," and references to "any department or agency of the United States" shall mean "any department or agency of the state of Idaho"; and for purposes of computing the twenty four (24) month period under Section 620(a)(1)(B) exports of unprocessed timber originating from private lands in the state of Idaho occurring prior to the adoption of the Act shall be disregarded. (6-3-91)
- 104. Indirect Export; Limitation. No person shall be deemed to have indirectly exported unprocessed timber as a result of actual export by a subsequent purchaser, if the person obtained from the person to which it sold, traded, or otherwise disposed of the unprocessed timber a written statement that the buyer would not export said unprocessed timber prior to its manufacture into a product not within the definition of unprocessed timber as defined in the Act.

 (6-3-91)
- 05. Applicability. The provisions of this rule shall apply to all state of Idaho timber sales occurring since the adoption of the Act. (6-3-91)

037. -- 999. (RESERVED).

This sale is located approximately 1.5 miles north of Deary, Idaho. This sale will harvest a mature stand of mixed species using a seed tree silvicultural prescription. Approximately 10-20 seed trees per acre are marked reserve. Both tractor and line skidding methods will be required to harvest this sale. Road development for this sale includes 3.7 miles of spur construction and 0.7 miles of open and improvement. Portions of the existing and newly constructed roads will be spot rocked. There are three (3) Class II streams within the sale area that are tributary to Barn Creek, a tributary to Big Bear Creek.

4	Creek	Pts. NE, Pts. N2NW	16	40N/3W	370	2,100 M
		Pts. E2SW, SE	16	40N/3W		

This sale is located approximately 8 miles west of Deary, Idaho. This sale area was harvested with a seed tree prescription about 20 years ago. Approximately half of the sale area will be an overstory removal prescription with areas of commercial thinning where size and stocking are adequate. The remaining sale area will be a seed tree prescription favoring healthy western larch, Douglas-fir, and western white pine as seed trees. The entire sale area will be tractor skidded. Approximately 3.1 miles of spur road will be opened and improved to harvest this sale. A Class II stream that is a tributary of the West Fork of Big Bear Creek dissects the sale in half. There are several additional Class II streams within the sale area.

This sale is located in the Mary Minerva McCroskey State Park approximately 10 air miles northwest of Potlatch, Idaho. The sale will thin existing stands to restore forest health by harvesting all species greater than 20" DBH except ponderosa pine, Iarch, and Douglas fir. The sale will be underburned following harvest to promote natural regeneration. Approximately 1.0 mile of new road may need to be constructed. Areas of the sale will be restricted to fall and winter logging to avoid recreational vehicle travel. The majority of the sale will be line skidded with tractor skidding on the ridges. No Class I or Class II streams are present within the sale area. This sale is located at the headwaters of the North Fork of Pine Creek, which flows into Farmington, Washington.

This sale is for the Idaho Department of Parks and Recreation.

This sale is located approximately 7 miles northwest of Crouch, Idaho. Middle Scriver is a compilation of commercial thinning and sanitation harvest in the Packer John State Forest. This sale is located in the Middle Fork of Scriver Creek, a Class I stream. Class I and II streams exist on the sale area. Developments include 3.5 miles of secondary road construction, 1.2 miles of spur road construction, 1.5 miles of spur road reconstruction, and 4.4 miles of open and improve. Even though numerous openings less than 10 acres in size are planned, no clearcuts will be necessary. The sale will be harvested with a combination of skyline yarding, off-road jammer skidding and tractor skidding.

This sale is located in an unnamed drainage, tributary to the North Fork of Thorn Creek, in the Boise Basin, approximately 5 miles south of Idaho City, Idaho. It will utilize an existing road system pre-built by a previous timber sale. Minor amounts of spur road construction will be necessary. The harvest will combine shelterwood and commercial thinning activities in the primarily ponderosa pine units, and will create numerous small openings in the third unit in an effort to regenerate ponderosa pine on Douglas-fir/ninebark sites. Even though numerous openings less than 10 acres in size are planned, no clearcuts will be necessary. Class I and II streams are present.

The Rattlesnake timber sale will commercially thin a stand that was last harvested in the mid-1970's. Thinning will result in a residual stocking of approximately 80 square feet of basal area of primarily ponderosa pine. Average diameter of the harvested volume is about 11 inches DBH and will leave a residual stand of 13 to 16 inches DBH. The sale lies primarily in the Wild Goat drainage 8 miles southwest of Centerville in the Boise Basin and contains both Class I and II streams. Approximately 2.0 miles of secondary road will be constructed. Harvest will be accomplished with tractor and/or off- road jammer skidding and minor amounts of skyline yarding harvest systems.

SOUTHWEST IDAHO SUPERVISORY AREA

4 Crouch View SWNW, N2SW, NWSE 9 9N/4E 160 1,200 M

This sale is a harvest of distressed timber. This isolated parcel of State land two (2) miles northwest of Crouch, Idaho has recently been attacked by a combination of pine bark beetles. While little of the heavy pine component of the parcel has actually been damaged by the infestation, the surrounding stands are at considerable risk of attack in the near term. Harvest will occur under a tight timeframe in order to divert possible spread of the beetle infestation. The sale area encompasses two unnamed Class II tributaries of the Middle Fork of the Payette River. Approximately 2.5 miles of spur road will be developed; 1.9 miles of new construction and 0.6 miles of reconstruction. Harvest will be accomplished with primarily tractor and/or off-road jammer harvest systems, but approximately 10% of the sale area is available only to line skidding with distances of 1,000 feet or less.

EASTERN IDAHO SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T&R	ACREAGE	APPROXIMATE VOLUME
1	East Face	Pts.	27	10S/39E	336	2,000 M
		Pts.	28	10S/39E		,
		Pts.	33	10S/39E		
		Pts.	34	10S/39E		

The sale is located in the Densmore Creek area 10 miles southeast of Lava Hot Springs. Harvest prescription will be a shelterwood with reserve marking. Developments include constructing 2 miles of spur road. The sale has a mixture of Douglas-fir, subalpine fir and lodgepole pine. Slopes vary from 20-70%. Some of the units may require line skidding. There are Class II streams adjacent but not within the sale unit boundary.
